

PhD and PostDoc Positions in Computer Vision

The Computer Vision group at Heidelberg University (Germany) is offering several fully funded PhD and PostDoc positions that became available with several recently acquired research grants. Your future research will be on different aspects of image and video understanding, with a particular focus on topics such as image and video synthesis, disentangled representation learning, visual retrieval, human behavior analysis, or deep metric learning. There is also the optional possibility to explore applications of this fundamental research through existing collaborations of the Computer Vision group in different areas such as automotive or neuroscience. You should have a strong background in vision and learning and be fluent in Python as well as English.

Our group offers an inspiring environment for your future research and our institute provides all you need to carry it out. And besides: the entire department has recently moved into a shiny new building with beautiful views of the picturesque medieval city of Heidelberg. The salary of the full position is competitive (TVL/13 up to TVL/14).

Your application should include a CV, a cover letter including a statement of research interests, a transcript of records, a list of publications, and two academic references. Should you have any other documents in support of your application that you want us to be excited about, send us a link – your and our mailservers will thank you. Please send your application as a PDF to hci.applications@iwr.uni-heidelberg.de. For further inquiries please contact Prof. Dr. Björn Ommer (hci.iwr.uni-heidelberg.de/Staff/bommer).
